DANGER AHEAD AND HOW TO AVOID IT.

The man is blind purposely who closes his eyes to the fact that this State and coast are upon the eve of an agitation that will have one of two outcomes—either the prostration of industry and the blocking of the wheels of trade and prosperity, or the legitimate accomplishment of a wise purpose that will contribute in due time to the general good.

It is possible to control this agitation, so that it will fulfill the latter end, or to consent to its being given over to the destructionists, with the first-named result. As to what shall be its method and effect depends wholly upon the business men and the conservative thought of this people. Right here in Sacramento the proper direction can be given to the movement. It remains to be seen if that will be done.

We concede to none any stronger position against the influx of Chinese immigrants, or the necessity for removing from labor the debilitating competition of the Chinese than this journal occupies and has from the outset. We concede to none more unwavering resistance to the disorder and ruin elements.

The anti-Chinese agitation must be controlled by the business sense of the community, or it will be subordinated to misrule. The great heart of the labor element, the thinking, intelligent, sensible and far-sighted mechanics, laborers and wage-winners, are right in their methods now. But unless this force has the immediate support of the business people, they must expect to be dictated by the strong arm of violence. Of this we are firmly convinced, and whoever looks deeply into the situation must arrive at the same conclusion.

The labor Convention in San Francisco has split asunder, the conservatives and law and order party having withdrawn, and the destructionists remaining in control. A similar thing will happen in Sacramento if business apathy permits. And if this comes about there will be no one to blame but those who will suffer most by it.

The one method of settling the Chinese question is that of non-patronage. That has often been advised by the people of the East, and there is no escape from it now. We occupy the attitude of insincerity so long as we demand the removal of Chinese competition and at the same time encourage it. Examination will convince any one that the middle men, the merchant and business class is not benefited by the sale of Chinese manufactures. Such labor has reduced the margin of profits until there is very little or anything profitable remaining in the business. A similar thing will happen in Sacramento if business apathy permits. And if this comes about there will be no one to blame but those who will suffer most by it.

The worker is himself quite as much at fault as any others. He is the chief consumer of Chinese manufactured goods. His consumption makes the demand.
